

App Guide

TBA Construction — Project Management

tba-app.vercel.app

Welcome! This is your one place to see every job on a map, track what's going on, manage your crew, and keep hours, materials, and photos together per project. This guide walks you through everything — no technical background needed. Open the app in any phone or computer web browser.

The two kinds of accounts

	Admin (owner / manager)	Worker (subs / crew)
Sees	Every project	Only projects you assign them
Map	All pins	Only their assigned pins
Add / edit projects	Yes	No
Materials & costs	Sees and edits	Never sees them at all
Hours	Sees everyone's totals	Logs only their own
Photos	Yes	Yes (on assigned jobs)
Manage workers	Yes	No

The key idea: **workers see only what they need**. They can log hours and snap job photos, but they can't see your costs, materials, or each other's hours. That's locked down at the data level — not just hidden on screen.

Signing in

1. Go to **tba-app.vercel.app**.
2. Enter your **email** and **password**.
3. Tap **Sign in**.

You stay signed in on that device until you log out. **To log out:** tap the menu (≡, top-left) → **Log out**.

The map (your home screen)

When you sign in you land on the **Project overview** map. Every job is a colored pin:

● Green = Active (work happening now) ● Amber = Upcoming (scheduled) ● Gray = Completed

Things you can do here:

- **Filter:** tap All / Active / Upcoming / Completed to show just those pins.
- **Tap a pin** for a quick card: name, address, status, work type, and the "Needs" note.
- **View details** → on that card opens the full project page.
- **Locate me** (📍, bottom-right) recenters the map on where you are.
- **+ Add** (top-right, admin only) starts a new project.

Adding a new project (admin)

1. On the map, tap **+ Add** (top-right).
2. Fill in the form — **Project name** and **Address** are required; work type, status, dates, and a scope/needs note are optional.
3. Tap **Save & drop pin**.

The app looks up the address and drops the pin automatically. If it can't find the address, it warns you — fix the address and save again, or save anyway and correct it later.

The project detail page

Tap any pin → **View details** →. This is the full record for one job. Admins see four tabs; workers see three (no Materials).

Overview tab

- **Job stage tracker: Demo / Prep → Build → Finish.** This is separate from the green/amber/gray status — it tracks where the physical work is. As admin, tap a stage to move the job along.
- **Details** — status, address, work type, dates. Tap **Edit** to change them (admin).
- **Scope / needs** — the working note for the job. Tap **Edit** to update it.
- **Assigned workers** (admin) — covered in "Managing your crew" below.

Materials tab (admin only)

- Tap **+ Add material**, then enter the item, quantity, unit cost, and status (**Needed / Ordered / Received**).
- The app multiplies quantity × cost and keeps a **running total** at the top.
- **Attach a receipt photo** to any line — choose Receipt photo and pick or snap a picture.
- Edit or delete any line anytime. *Workers never see this tab or any of these numbers.*

Hours tab

- **Workers** see My hours: tap **+ Add hours**, pick the date, enter hours, add an optional note. They can edit/delete their own entries.
- **Admins** see the rollup: total hours per worker plus every entry, so you know who logged what.

Photos tab

- Anyone assigned to the job can add photos — choose Photo, pick or snap an image, add an optional caption.
- Tap a photo to view it full-size. Delete your own (admins can delete any).
- Great for progress shots, before/after, and documenting issues on site.

Managing your crew

Add a worker

1. Menu (≡, top-left) → **Manage workers**.
2. Under Add a worker, enter their **name**, an **email**, and a **temporary password** (6+ characters).
3. Tap **Create worker**.
4. Hand the worker that email + password — they sign in with it.

The email doesn't have to be a real inbox — it's just their username. Use something easy like `mike@tbacrew.com` if you like.

Assign a worker to a job

A worker sees **nothing** until you assign them to a project.

1. Open the project → **Overview** tab → **Assigned workers**.
2. Pick the worker from the dropdown → **Assign**.
3. To remove them, tap **Remove** next to their name.

Assign the same worker to as many jobs as you need.

A worker's day

1. Sign in at `tba-app.vercel.app` with the email/password you gave them.
2. Their map shows only their assigned jobs.
3. Tap a job → **View details**.
4. **Hours tab** → **+ Add hours** to log time for the day.
5. **Photos tab** to add job-site pictures.

Simple on a phone, in the field.

Put it on your phone

- **iPhone (Safari)**: open the site → tap **Share** → **Add to Home Screen**.
- **Android (Chrome)**: open the site → tap the **:** menu → **Add to Home screen**.

Quick troubleshooting

- **"I can't see any projects."** If you're a worker, you haven't been assigned to a job yet — ask your admin. If you're the admin and the map is empty, you haven't added any projects yet.
- **"A new project's pin isn't on the map."** The address couldn't be located. Open the project, tap Edit, and correct the address.
- **"I forgot my password."** Ask your admin to reset it for you.
- **"A worker says they can see costs."** They can't — materials and costs are completely hidden from worker accounts. Double-check they're in their own worker account, not an admin account.
